Remote Work Security Standard

Standard owner: Priya Natarajan

Version: 1.0

1. Objective

This standard protects company data when employees work outside the office, on home networks and in public places.

2. Scope

It covers all staff who work remotely, on company-managed laptops and mobile devices.

3. Responsibilities

Employees keep devices updated and locked. IT manages device encryption and VPN access. Managers approve remote work arrangements.

4. Requirements

4.1 Network Access

Connect through the company VPN before accessing internal systems. Public Wi-Fi is allowed only with the VPN connected.

4.2 Device Security

- Full-disk encryption must be enabled.
- Screens lock after five minutes of inactivity.
- Only company-approved software may be installed.

4.3 Logging

VPN connections and device check-ins are logged centrally and kept for one year.

Log source	Retention
VPN gateway	12 months
Endpoint agent	12 months

5. Non-Compliance

Remote access may be suspended for devices that do not meet this standard.
